LOCAL NOTICE TO MARINERS

District 8 MRS

Week: 05/16

Mississippi River System

LIGHT LIST VOLUME V
NOTICE NUMBER 05-16
February 3, 2016

LIGHT LIST REFERENCE: COMDTPUB P16502.5, Vol V, 2016 Edition.

CONTENTS: Rivers are listed in alphabetical order and are included only when there is information to report.

Broadcast Notice to Mariners Covered in this Edition

Originating Unit	Beginning BNM's	Ending BNM's
Sector Upper Mississippi River	0040 - 16 (UM)	0047 - 16 (UM)
Sector Lower Mississippi River	0050 - 16 (LM)	0082 - 16 (LM)
Sector Ohio Valley	0020 - 16 (OV)	0030 - 16 (OV)
OB DWB	0007 - 16 (OB)	0008 - 16 (OB)

COAST GUARD DISTRICT 8, WATERWAYS, (504) 671-2327, 7:00 a.m. until 3:30 p.m. (CST)

COMMENTS REGARDING SECTION VI – PROPOSED CHANGES MAY ALSO BE EMAILED TO: LocalNoticeFeedback@uscg.mil

ABBREVIATIONS

A through H

ADRIFT - Buoy Adrift
AICW - Atlantic Intracoastal Waterway
AI - Alternating
B - Buoy
BKW - Breakwater
bl - Blast
BNM - Broadcast Notice to Mariner
bu - Blue
C - Canadian
CHAN - Channel
CGD - Coast Guard District
C/O - Cut Off
CONT - Contour
CRK - Creek
CONST - Construction
DAYMK/Daymk - Daymark
DBN/Dbn - Daybeacon
DBD/DAYBD - Dayboard
DEFAC - Defaced
DEST - Destroyed
DISCON - Discontinued
DMGD/DAMGD - Damaged
ec - eclipse
EST - Established Aid
ev - every
EVAL - Evaluation
EXT - Extinguished
F - Fixed
fl - flash

I through O

I - Interrupted
ICW - Intracoastal Waterway
IMCH - Improper Characteristic
INL - Inlet
INOP - Not Operating
INT - Intensity
ISL - Islet
Iso - Isophase
kHz - Kilohertz
LAT - Latitude
LB - Lighted Buoy
LBB - Lighted Bell Buoy
LHB - Lighted Horn Buoy
LGB - Lighted Gong Buoy
LONG - Longitude
LNM - Local Notice to Mariners
LT - Light
LT CONT - Light Continuous
LTR - Letter
LWB - Lighted Whistle Buoy
LWP - Left Watching Properly
MHz - Megahertz
MISS/MSNG - Missing
Mo - Morse Code
MRASS - Marine Radio Activated Sound Signal
MSLD - Misleading
N/C - Not Charted
NGA - National Geospatial-Intelligence Agency
NO/NUM - Number

P through Z

PRIV - Private Aid
Q - Quick
R - Red
RACON - Radar Transponder Beacon
Ra ref - Radar reflector
RBN - Radio Beacon
REBUILT - Aid Rebuilt
RECOVERED - Aid Recovered
RED - Red Buoy
REFL - Reflective
RRL - Range Rear Light
RELIGHTED - Aid Relit
RELOC - Relocated
RESET ON STATION - Aid Reset on Station
RFL - Range Front Light
RIV - River
RRASS - Remote Radio Activated Sound Signal
s - seconds
SEC - Section
SHL - Shoaling
si - silent
SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
SS - Sound Signal
STA - Station
STRUCT - Structure
St M - Statute Mile
TEMP - Temporary Aid Change

FI - Flashing
G - Green
GIWW - Gulf Intracoastal Waterway
HAZ - Hazard to Navigation
HBR - Harbor
HOR - Horizontal Clearance
HT - Height

NOS - National Ocean Service
NW - Notice Writer
OBSCU - Obscured
OBST - Obstruction
OBSTR - Obstruction
Oc - Occulting
ODAS - Anchored Oceanographic Data Buoy

TMK - Topmark
TRLB - Temporarily Replaced by Lighted Buoy
TRLT - Temporarily Replaced by Light
TRUB - Temporarily Replaced by Unlighted Buoy
USACE - Army Corps of Engineers
W - White
Y - Yellow

Additional Abbreviations Specific to this LNM Edition:

RIAC - River Industry Action Committee
MMSI - Mobile Maritime Service Identity
AIS - Automatic Identification System
ATON - Aids To Navigation

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jttfs, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: DPW

DGPS UNUSABLE TIME - HARTSVILLE, TENNESSEE

The Hartsville, Tennessee, DGPS Site will be off-air for maintenance from 1500Z, until 1900Z, March 3, 2016. The alternate time is from 1500Z until 1900Z, March 4, 2016.

LNM: 03-16

UPPER MISSISSIPPI RIVER - L/D CLOSURES

Continuing until March 4, 2016, the following L/D's will be staffed to lock traffic/closed as indicated.

L/D 9, in the vicinity of Mile 647.9, is closed until March 17, 2016.

L/D 13, vicinity of Mile 522.5, L/D 14, vicinity of Mile 493.3 and L/D 17, vicinity of Mile 437.1, will be closed to navigation.

L/D 21, vicinity of Mile 324.9, will be closed to navigation from January 4, 2016 through March 4, 2016. L/D 21 will be staffed to lock traffic 24-hours a day, 7-days a week, through January 3, 2016.

L/D 11, vicinity of Mile 583.0 and L/D 12, vicinity of Mile 556.7, will be staffed to lock traffic from 8:00 a.m. until 4:00 p.m., Monday through Friday, from December 14, 2015 through March 4, 2016.

L/D 15, vicinity of Mile 482.9, L/D 16, vicinity of Mile 457.2, L/D 18, vicinity of Mile 410.5, L/D 19, vicinity of Mile 364.3 and L/D 20, vicinity of Mile 343.2, will be staffed to lock traffic from 8:00 a.m. until 4:00 p.m., Monday through Friday, from December 21, 2015 through March 4, 2016.

L/D 22, vicinity of Mile 301.2, will continue to lock traffic 24-hours a day, 7-days a week, through January 3, 2016. It will then be staffed to lock traffic from 8:00 a.m. until 4:00 p.m., Monday through Friday, from January 4, 2016 through March 4, 2016.

Tows requiring a lockage outside of these hours, must contact the lockmaster in advance so that lock operators can be called in to operate the lock. Winter conditions will dictate whether or not a lockage can be accomplished.

Operational Aspects

Rake to box ice couplings the entire width of the tow, at break points of the tow, will be required at all locks when ice is present at the lock.

Double tripping and the use of industry helper boats during ice conditions will be required if proper couplings are not accomplished prior to arrival at the locks. Failure to have the tow configured properly may result in the loss of lock turn. Tow configuration to ice couplings shall not be accomplished at the lock or lock approach.

LNM: 49-15

DGPS UNUSABLE TIME - DANDRIDGE, TENNESSEE

The Dandridge, Tennessee, DGPS Site will be unusable from 1400Z until 1600Z, February 29, 2016. The alternate times are 1400Z until 1600Z, March 1, 2016.

LNM: 03-16

RED RIVER - SAFETY ADVISORY/CHANNEL CONDITION

The COTP Lower Mississippi River has issued a Safety Advisory for extreme high water between approximate Miles 236.0 and 0.0. Mariners are advised to transit with caution due to the hazardous conditions associated with strong currents, severe outdrafts, missing/off station aids to navigation and diving buoys. Fleet operators should regularly check their fleets and immediately report barge breakaways to the U.S. Coast Guard. The COTP Lower Mississippi River with the concurrence of the Red River Valley association, recommends the following limits on upbound and downbound tows. Towing vessels must have no less than 500 horse power per barge and push no more than 6 barges total. Towing

vessels shall only transit from sunrise to sunset. Daylight transit only through the Jackson Street Bridge in the vicinity of Mile 88.6. Mariners are requested to contact the bridge operator 2-3 hours prior to transit. Mariners are requested to contact the U.S. Coast Guard Sector Lower Mississippi River via VHF-FM Channel 16 or at (866) 777-2784, for additional information or to report areas of concern.

LNM: 04-16

LOWER MISSISSIPPI RIVER - VICKSBURG INFORMATION CENTER

The Vicksburg Information Center (VIC) will be established by the Lower Mississippi River Committee (LOMRC) when the Vicksburg Gauge reaches 40 feet, to provide mariners with the most current information related to river conditions effecting transit through the Vicksburg Bridges and approach. The following guidelines are in place to aid in the safe transit through the Vicksburg Bridges and approach.

Downbound tows greater than 110 feet shall only transit through the Vicksburg Bridges from sunrise until sunset.

Downbound tows will check in with the VIC, during daylight hours, at the following locations; Mile 455.0, Milliken Bend and Mile 445.0, Browns Point.

North bound tows will normally be cleared during the night, but can be passed during the day if south bound traffic is light or if the VIC coordinator deems it safe.

Vessel queues will be maintained by the VIC, during this high water event and can be contacted via VHF-FM Channel 13 or at (601) 631-3428 and is the primary contact.

LNM: 04-16

ARKANSAS RIVER - WHITE RIVER ENTRANCE - CHANNEL CONDITIONS/USACE NAVIGATION NOTICE

Attached as an enclosure to this LNM, is a USACE Little Rock District Navigation Notice 16-14, regarding increased differentials on the White River Entrance Channel.

LNM: 05-16

ILLINOIS WATERWAY - CHANNEL CONDITION/SAFETY ADVISORY - UPDATE

Water levels are receding, the Safety Advisory is cancelled.

LNM: 05-16

USACE NASHVILLE DISTRICT - SELF HELP PROGRAM AND LOCKAGE PROCEDURES

Attached as an enclosure to this LNM, is USACE Nashville District Notice to Navigation Interests 5437, Local Notice LRN 15-58, regarding the Self Help Program and Lockage Procedures at Nashville District Locks.

LNM: 45-15

USACE AIS BROADCAST TESTING

Continuing until further notice, the U.S. Army Corps of Engineers (USACE) and U.S. Coast Guard (USCG) will begin AIS broadcast testing throughout the Western Rivers. The AIS transmissions will include Aids to Navigation, meteorological, and hydrographic data. These broadcasts will be made through both USACE and USCG AIS installations throughout the river system. Questions and comments can be made to: USACE, Mr. Brian Tetreault (Brian.J.Tetreault@usace.army.mil), or USCG, Mr. R. David Lewald (Robert.D.Lewald@uscg.mil).

LNM: 46-15

OHIO RIVER AND TRIBUTARIES - WINTER NAVIGATION

Attached as an enclosure to this LNM is a USACE Huntington District Notice to Navigation Interests 16-01, regarding winter navigation on the Ohio River and tributaries.

LNM: 01-16

USACE HUNTINGTON DISTRICT LOCKS MAIL DELIVERY AND CREW CHANGE POLICIES

Attached as an enclosure to this LNM is a USACE Huntington District Notice to Navigation Interests 16-04, regarding mail delivery and crew change policies at navigation locks, for towboats.

LNM: 01-16

USACE HUNTINGTON DISTRICT NOTIFICATION OF SINKING OR SUNKEN VESSELS, VESSEL GROUNDINGS AND BARGE BREAKAWAYS

Attached as an enclosure to this LNM is a USACE Huntington District Notice to Navigation Interests 16-03, regarding notification of sinking or sunken vessels, vessel groundings and barge breakaways.

LNM: 01-16

USACE HUNTINGTON DISTRICT - REVIEW OF REGULATIONS AND GENERAL SAFETY PRACTICES

Attached as an enclosure to this LNM is a USACE Huntington District Notice to Navigation Interests 16-02, regarding the review of regulations and general safety practices.

LNM: 01-16

MISSOURI RIVER - VHF-FM HIGH LEVEL SITE

Continuing until further notice, the Gasconade VHF-FM High Level Site, in the vicinity of Mile 105.0, is unable to monitor VHF-FM Channel 16, between approximate Miles 155.0 and 55.0. Mariners are requested to monitor VHF-FM Channel 16 and make reports to U.S. Coast Guard Sector Upper Mississippi River at (314) 269-2332.

LNM: 04-16

LOWER MISSISSIPPI RIVER - CHANNEL CONDITION/AIDS TO NAVIGATION

Due to extreme high water condition between approximate Miles 813.0 and 683.0, dike markers have been reported missing in the area.

LNM: 05-16

LOWER MISSISSIPPI RIVER - SAFETY ADVISORY/CHANNEL CONDITION - UPDATE

The COTP Lower Mississippi has issued an extreme high water Safety Advisory from Mile 725.5 to Mile 439.0, due to hazardous conditions associated with strong currents, severe outdrafts, missing/off station aids to navigation and diving buoys. The COTP in concurrence with the Lower Mississippi River Committee recommends the following limits to tows when the Greenville, Mississippi, Gauge reaches 45.0 feet and falling: Doundbound:

Towing vessels must have at least 240 horsepower with a maximum tow size of 36 barges.

Towing vessels with 8,400 horsepower to 7,201 horsepower, 240 horsepower per loaded barge with a maximum tow size of 35 barges.

Towing vessels with 7,200 horsepower to 6,001 horsepower, 240 horsepower per loaded barge with a maximum tow size of 30 barges.

Towing vessels with less than 6,000 horsepower, a maximum tow size of 25 barges.

All upbound tows must maintain an average speed of 3.0 MPH over ground from 2 miles leading up to all bridges. If a tow is unable to average a minimum speed of 3.0 MPH, it must arrange for an assist tug or reduce tow size.

Fleet operators should regularly check their fleets and immediately report barge breakaways to the U.S. Coast Guard. Mariners are requested to contact the U.S. Coast Guard Sector Lower Mississippi River via VHF-FM Channel 16 or at (866) 777-2784, for further information or to report area of concern.

LNM: 05-16

LOWER MISSISSIPPI RIVER SAFETY ADVISORY/CHANNEL CONDITION - UPDATE

The COTP Lower Mississippi has issued an extreme high water Safety Advisory from Mile 439.0 to Mile 303.0, due to hazardous conditions associated with strong currents, severe outdrafts, missing/off station aids to navigation and diving buoys. The COTP in concurrence with the Lower Mississippi River Committee recommends the following limits for tows transiting between Mile 439.0 and Mile 303.0.

Downdbound:

Towing vessels must have at least 240 horsepower per loaded barge with a maximum tow size of 36 barges.

Towing vessels with 7,201 horsepower to 8,400 horsepower, 240 horsepower per loaded barge with a maximum tow size of 35 barges.

Towing vessels with 6,001 horsepower to 7,200 horsepower, 240 horsepower per loaded barge with a maximum tow size of 30 barges.

Towing vessels with less than 6,000 horsepower, 240 horsepower per loaded barge with a maximum tow size of 30 barges.

All upbound tows must maintain an average speed of 3.0 MPH over the ground for 2-miles leading up to all bridges. If a tow is unable to average a minimum speed of 3.0 MPH, it must arrange for an assist tug or reduce tow size through the bridges.

Fleet operators should regularly check their fleets and immediately report barge breakaways to the U.S. Coast Guard. Mariners are requested to contact the U.S. Coast Guard Sector Lower Mississippi River via VHF-FM Channel 16 or at (866) 777-2784, for further information or to report area of concern.

LNM: 05-16

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
None		

Advance Notice(s)**OHIO RIVER**

The following change will be made the week of February 22, 2016.
Discontinue Muskingum Island Lower Light (LLNR-24220).

LNM: 08-15-71D

OHIO RIVER

The following change will be made the week of March 14, 2016.
Discontinue Ledbetter Light (LLNR-28160).

LNM: 08-15-67D

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

PROPOSED WATERWAY PROJECTS OPEN FOR PUBLIC COMMENT

None			

Proposed Change Notice(s)**COMMENTS TO BE RECEIVED BY February 15, 2016****CLINCH RIVER**

Change Rainier Knob Upper Daybeacon (LLNR-3026) to Rainier Knob Upper Buoy (LLNR-3026) at mile 41, Right Bank, showing a Green can.

LNM: 08-16-11D

COMMENTS TO BE RECEIVED BY February 15, 2016**TENNESSEE RIVER**

Change Half Moon Foot Light (LLNR-30600) to Half Moon Foot Buoy (LLNR-30600) at mile 546.2, Right Bank, showing a Green can.

LNM: 08-16-12D

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

ARKANSAS RIVER**MILE 374.8 - MILE 373.5 - CHANNEL CONDITION/USACE ADVISORY**

Shallow pool conditions reportedly exist between approximate Miles 374.8 and 373.5, Pool 16. Mariners are advised to transit along the green

ARKANSAS RIVER

MILE 374.8 - MILE 373.5 - CHANNEL CONDITION/USACE ADVISORY

line. The channel depth varies, no passing is recommended while transiting this reach. Mariners are urged to contact L/D 16 for the latest information. Questions or requests for additional information should be directed to Mr. Vic Heister, Navigation Field Engineer at (918) 669-7244 or Mr. Robert Steiner, Navigation Operation Manager at (918) 607-0952.

LNM: 05-16

MILE 374.4 - MILE 373.8 - CHANNEL CONDITION

Shoaling has been reported between approximate Miles 374.4 and 373.8. Mariners are urged to exercise caution in the area.

LNM: 05-16

MILE 348.3 - CHANNEL CONDITION

Shoaling has been reported in the vicinity of Mile 348.3. A M/V with a draft of 6 feet reported shoaling extending across the entire width of the channel. Attached as an enclosure to this LNM is a USACE Tulsa District Navigation Notice TD 2016-2 Amendment 1, regarding the navigation channel. Mariners are urged to exercise caution in the area.

LNM: 02-16

MILE 300.4 - BRIDGE MAINTENANCE

U.S. 64-71 Bridge; Cleaning and painting of the bridge will occur Monday through Friday, from 7:00 a.m. until 5:30 p.m. Work only involves the approach spans and will not impact the navigation channel. Mariners are urged to transit the bridge with caution.

LNM: 35-15

MILE 300.4 - VISIBLE OBSTRUCTION - UPDATE

The old Wildcat Marina previously pushed up against the U.S. 64-71 Bridge (LLNR 1330), in the vicinity of Mile 300.4, LDB, has been recovered and moored to a nearby bank.

LNM: 05-16

MILE 223.2 - MILE 222.0 - CHANNEL CONDITION

Shoaling has been reported between approximate Miles 223.2 and 222.0. The USACE recommends that until further notice, both up bound and down bound tows should run the can buoy line. No passing is advised while transiting this reach. The USACE M/V SHORTY BAIRD and a crane barge are in the area to reset the buoys and clam high spots. Mariners are urged to contact the M/V SHORTY BAIRD via VHF-FM Channel 82, at least 30 minutes prior to reaching this area to ensure that the area is clear to pass. Mariners may contact Mr. Jamie McKinnie, USACE Little Rock District at (501) 324-5739 or (501) 324-5096. Mariners are urged to exercise caution in the area.

LNM: 04-16

MILE 155.9 - L/D TOW HAULAGE

The tow haulage equipment at the Toad Suck Ferry L/D in the vicinity of Mile 155.9, is out of service. Double cut tows will have to be locked the conventional way without the use of tow haulage. Mariners may contact Mr. Jamie McKinnie, USACE Little Rock District at (501) 324-5739 or (501) 324-5096. Mariners are urged to exercise caution in the area.

LNM: 04-16

MILE 125.4 - MILE 118.2 - CHANNEL CONDITION/REGULATED NAVIGATION AREA

The USACE Little Rock, advises that the flow on the Arkansas River, at Murray L/D, vicinity of Mile 125.4, has exceeded 70,000 cubic feet per second. The Regulated Navigation Area, at Little Rock, Arkansas, from Mile 125.4 to Mile 118.2, is now in effect. Mariners transiting this area must follow the Special Operating Procedures outlined in Title 33 Code of Federal Regulations, Part 165.817 and Part 117.123.

LNM: 02-16

MILE 125.4 - USACE NAVIGATION ADVISORY

Due to shoaling, mariners are advised to favor the long wall in the downstream approach to the Murray L/D 7, in the vicinity of Mile 125.4. Mariners may contact Mr. James McKinnie, USACE Little Rock District at (501) 324-5739 or (501) 324-5096, for additional information.

LNM: 04-16

MILE 119.1 - BRIDGE MAINTENANCE

Broadway Bridge; Work continues outside of the navigation channel on the left descending side of the river. The drilled shaft template remains in place along the right descending side of the channel and is properly lit. Mariners may contact the onsite work boat M/V PENSURM via VHF-FM Channels 13 or 16, for more information. No impacts to navigation are anticipated.

LNM: 50-15

MILE 108.0 - USACE NAVIGATION ADVISORY

Due to shoaling, mariners are advised to favor the long wall in the downstream approach to the David D. Terry L/D 6, in the vicinity of Mile 108.0. Mariners may contact Mr. James McKinnie, USACE Little Rock District at (501) 324-5739 or (501) 324-5096, for additional information.

LNM: 04-16

MILE 86.0 - USACE NAVIGATION ADVISORY

Due to shoaling, mariners are advised to favor the long wall in the downstream approach to the Col. Charles D. Maynard L/D 5, in the vicinity of Mile 86.0. Mariners may contact Mr. James McKinnie, USACE Little Rock District at (501) 324-5739 or (501) 324-5096, for additional information.

MILE 86.0 - USACE NAVIGATION ADVISORY

LNM: 04-16

MILE 82.8 - CHANNEL CONDITION

Shoaling has been reported in the vicinity of Mile 82.8, RDB. A M/V reportedly grounded at this location with a 9-foot draft on January 26, 2016. Mariners are urged to exercise caution in the area.

LNM: 05-16

MILE 73.0 - MILE 0.0 - AIDS TO NAVIGATION

Aids to navigation may be unreliable between approximate Miles 73.0 and 0.0, due to high water conditions. Multiple buoys are not properly marking the channel and are diving in the area. Mariners are urged to exercise caution in the area.

LNM: 50-15

MILE 66.0 - USACE NAVIGATION ADVISORY

Due to shoaling, mariners are advised to favor the long wall in the downstream approach to the Emmett Sanders L/D 4, in the vicinity of Mile 66.0. Mariners may contact Mr. James McKinnie, USACE Little Rock District at (501) 324-5739 or (501) 324-5096, for additional information.

LNM: 04-16

MILE 341.5 - MILE 339.0 - MARINE EVENT

On February 27, 2016, from 7:00 a.m. until 12:00 p.m., the University of Alabama will hold rowing competition between approximate Miles 341.5 and 339.0, Tuscaloosa, Alabama. This event is published in 33 Code of Federal Regulations part 100.801 (Table 7, Sector Mobile #4) as a Special Local Regulation. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol Commander and when so directed by that officer and will be operated at a no wake speed in such a manner which will not endanger participants in the event or any other craft. The Patrol Commander may be contacted via VHF-FM Channel 16, call sign PATCOM. For further information, mariners may contact U.S. Coast Guard Sector Mobile, Alabama, at (251) 441-5976.

LNM: 05-16

BLACK WARRIOR RIVER - TOMBIGBEE WATERWAY**MILE 308.6 - CHANNEL CONDITION - UPDATE**

A bank slide-in previously reported in the vicinity of Mile 308.6, RDB, Hull's Bar, has been cleared. The navigation channel has been restored to an operational width of approximately 200 feet.

LNM: 05-16

CLINCH RIVER**MILE 52.0 - MILE 49.0 - MARINE EVENT**

Attached as an enclosure to this LNM, is a USACE Nashville District Notice to Navigation Interests 16-02, regarding the Oak Ridge Rowing Association 2016 schedule.

LNM: 05-16

CUMBERLAND RIVER**MILE 190.4 - BRIDGE REPAIRS - UPDATE**

Louisville and Nashville Railroad Drawbridge; Due to the emergency cabling system installed on the drawbridge, the left descending navigational channel span remains blocked to navigation. Towboats transiting the drawbridge are now REQUIRED to use only the right descending navigation span and may pass under the bridge if an opening is not needed. When water levels are forecasted to rise, the cabling system will be activated and once manned will open with a 1 hour advance notice during daylight hours only. Mariners are requested to contact the drawtender in advance prior to transiting the bridge via VHF-FM radio channels 13 and 16 or by phone at (615) 256-4193.

LNM: 05-16

MILE 126.7 - MILE 126.6 - RIP RAP PLACEMENT

Continuing until March 1, 2016, rip rap placement will be conducted between approximate Miles 126.7 and 126.6. Work will be conducted from 6:30 a.m. until 5:00 p.m., 7-days a week. The fleet boat will monitor VHF-FM Channels 9 or 71. The contractors floating plant will consist of several deck barges, 2 tender boats and a spud barge. The work area is outside the navigational channel. Work equipment will be moored along the RDB during non-working hours. Mariners are urged to exercise caution when transiting the area.

LNM: 43-15

MILE 63.1 - BRIDGE CONSTRUCTION/MAINTENANCE

Henry Lawrence Replacement Bridge; Temporary trestles are being constructed on the downstream side of the existing bridge, from both LDB and RDB. The left descending trestle currently blocks the auxiliary navigation channel and mariners are now REQUIRED to use the preferred right descending main navigation channel span. The auxiliary channel's left descending red pier light and center green navigation lights have been extinguished. Trestles should have no impact to mariners on the right descending main navigation channel span.

LNM: 04-16

MILE 30.6 - INTERMITTENT L/D CLOSURES

Commencing February 8, 2016 and continuing until February 23, 2016, from 6:00 a.m. until 4:30 p.m., each day, the Barkley L/D in the vicinity of Mile 30.6, will be closed for maintenance. Intermittent delays for lockage should not exceed 4-hours, each day. There is no auxiliary lock available at this location.

MILE 30.6 - INTERMITTENT L/D CLOSURES

LNM: 03-16

ILLINOIS WATERWAY

MILE 207.8 - BRIDGE REPAIRS

I-80 (FAI 180) Bridge; The M/V TAMARA LYNN will be conducting repairs to the bridge and will be positioning a work barge at various locations under the bridge during daylight hours, until February 15, 2016. The work barge may move with a 30-minute advance notice and can be contacted via VHF-FM Channel 16 or by phone at (815) 791-9185.

LNM: 50-15

MILE 181.0 - MILE 167.0 - ONE-WAY TRAFFIC

In accordance with the Illinois Waterway Action Plan Annex, navigation has been restricted to one way traffic between Mile 181.0 and 167.0. This will help maintain the current ice trail and prevent sheet ice from breaking off the bank. Mariners should be aware that buoys may be unreliable due to icing conditions. Ice flows render reflective material ineffective and may drag buoys off station and sever their moorings. Mariners are urged to exercise caution in the area.

LNM: 03-16

MILE 169.9 - AID TO NAVIGATION

The Drolls Point Light (LLNR-7030) was previously reported destroyed. The lighted buoy marking this downed structure is being removed for ice season. Mariners are urged to exercise caution in the area.

LNM: 44-15

MILE 167.9 - AID TO NAVIGATION

The Peoria Heights Light (LLNR-7040) was previously reported destroyed. The lighted buoy marking this downed structure is being removed for ice season. Mariners are urged to exercise caution in the area.

LNM: 44-15

MILE 71.3 - BRIDGE REPLACEMENT

Meredosia Bridge Replacement; Due to high water, construction work on the left descending cofferdam has been suspended until river levels recede.

LNM: 01-16

KASKASKIA RIVER

MILE 3.0 - BRIDGE MAINTENANCE

Route 182 Bridge; Bridge pier and deck repair work continues from 7:00 a.m. to 5:30 p.m., Monday through Friday. Mariners may contact the onsite work boat M/V MISS LUCY via VHF-FM channel 13 for further information.

LNM: 44-15

LITTLE TENNESSEE RIVER

MILE 0.6 - BRIDGE MAINTENANCE

Tennessee State Highway Bridge (Over Tellico Canal); Work barges will be in the navigation channel at various locations for steel erection. For additional information mariners may contact M/V LILA BLANCHE via VHF-FM Channels 13 or 16 or the onsite supervisor at (865) 640-5924.

LNM: 41-15

LOWER MISSISSIPPI RIVER

MILE 784.5 - AIDS TO NAVIGATION - UPDATE

Multiple nun buoys previously reported missing in the vicinity of Mile 784.5, have been reset.

LNM: 05-16

MILE 781.5 - AIDS TO NAVIGATION - UPDATE

Multiple can buoys previously reported missing in the vicinity of Mile 781.5, have been reset.

LNM: 05-16

MILE 772.6 - AIDS TO NAVIGATION - UPDATE

Multiple can buoys previously reported missing in the vicinity of Mile 772.6, Lookout Dikes 1 and 2, have been reset.

LNM: 05-16

MILE 755.6 - AIDS TO NAVIGATION - UPDATE

Multiple can buoys previously reported missing in the vicinity of Mile 755.6, Corona Bar Dike, have been reset.

LNM: 05-16

MILE 728.0 – 726.0 - SAFETY ZONE/SUNKEN VESSEL/SALVAGE OPERATION - UPDATE

A M/V sunk in the vicinity of Mile 727.0, LDB. The COTP Lower Mississippi River has issued a Safety Zone from Mile 728.0 to Mile 726.0, to facilitate salvage operations. Vessels are being passed through this Safety Zone under very strict guidelines and monitored. Vessels shall not meet, pass or overtake within this Safety Zone. A minimum of 1 mile must be maintained between vessel tows and transit the area at their slowest safe speed to

MILE 728.0 – 726.0 - SAFETY ZONE/SUNKEN VESSEL/SALVAGE OPERATION - UPDATE

minimize their wake. Mariners are advised to transit as close as possible to the RDB and remain as far away from the salvage operations at Mile 727.0. Mariners may contact U.S. Coast Guard Sector Lower Mississippi River via VHF-FM Channel 16 or by calling (901) 521-4822, with any questions or concerns.

LNM: 05-16

MILE 708.4 - AID TO NAVIGATION

A stray can buoy has been reported hung up on Cat Island Dike Nr. 7 in the vicinity of Mile 708.4. Mariners are urged to exercise caution in the area.

LNM: 02-16

MILE 642.5 - AIDS TO NAVIGATION

Two nun buoys have been reported missing in the vicinity of Mile 642.5, lower end in Old Town Bend. Mariners are urged to exercise caution in the area.

LNM: 52-15

MILE 595.0 - MILE 591.0 - CHANNEL CONDITION/SAFETY ADVISORY - UPDATE

The U.S. Coast Guard Sector Lower Mississippi River Safety Advisory between approximate Miles 595.0 and 591.0, has been rescinded.

LNM: 05-16

MILE 539.0 - FLOATING DOCK

The Gerald Anders Energy Plant floating dock in the vicinity of Mile 539.0, has been powered off due to high water. The barge has been marked with yellow flashing lights. Mariners are urged to exercise caution in the area.

LNM: 04-16

MILE 530.8 - BRIDGE REPAIR

U.S. Highway 82 Mississippi River Bridge; Pier cap repair work will require the installation of scaffolding mounted channelward of the pier. A work barge will also be located adjacent to the pier and will be removed nightly. The work barge will extend approximately 6 feet past the red margin channel light and only one pier will be done at a time. Mariners should exercise caution when transiting the bridge.

LNM: 32-15

MILE 501.7 - CHANNEL CONDITION

A possible sandbar has been reported built up in the vicinity of Mile 501.7. A M/V reportedly grounded at this location with a draft of 10 feet 3 inches, while favoring the LDB, on January 25, 2016. Mariners are urged to exercise caution in the area.

LNM: 04-16

MILE 500.7 - SUNKEN BARGE

A barge has reportedly sunk in the vicinity of Mile 500.7, mid-channel. A recent survey of the area located the barge flat on the bottom with approximately 80 feet of water over the top. Mariners are urged to exercise caution in the area.

LNM: 04-16

MILE 435.8 - SAFETY ZONE - VICKSBURG BRIDGE - UPDATE

The COTP Lower Mississippi River Safety Zone in the vicinity of Mile 435.8, Vicksburg Bridge, has been rescinded.

LNM: 05-16

MILE 431.0 - SUNK BARGES

Two barges have been reported sunk in the vicinity of Mile 431.0, LDB. The barges have been reported in approximately 80 feet of water. Salvage operations are pending water levels to subside. Mariners are urged to exercise caution in the area.

LNM: 05-16

MILE 408.0 - MILE 405.0 - SAFETY ZONE - UPDATE

The COTP Lower Mississippi River Safety Zone from Mile 408.0 to Mile 405.0, has been rescinded.

LNM: 05-16

MILE 319.0 - MILE 311.0 - SAFETY ZONE - UPDATE

The COTP Lower Mississippi River Safety Zone restricting traffic near the Old River Control Structures, between Mile 319.0 and Mile 311.0, has been lifted.

LNM: 05-16

MILE 316.5 - MILE 311.0 - CHANNEL CONDITION/USACE RESTRICTION - UPDATE

USACE New Orleans District Navigation Bulletin 16-04, regarding navigation in the vicinity of inflow channels between approximate Miles 316.5 and 311.0, has been cancelled.

LNM: 05-16

UPPER MISSISSIPPI RIVER

UPPER MISSISSIPPI RIVER
MILE 725.9 - BRIDGE MAINTENANCE

Winona Highway Bridge; Two form travelers will be in place until July 2016, with horizontal clearance being reduced to 409 feet. Vertical clearance on the outside edge of the channel will be reduced to 53 feet 8 inches and the center span clearance will not be affected. For additional information mariners may contact the M/V CHARLIE D via VHF-FM Channels 13, 14 or 16 or by phone at (612) 360- 4849.

LNM: 40-15

MILE 535.0 - BRIDGE MAINTENANCE

Sabula Railroad Drawbridge; Effective 7:00 a.m., December 16, 2015, the drawbridge is closed to river traffic. Request for an opening requires a 24-hour notice to be given by contacting Kevin Law (605) 321-8613 or Bruce Wold (605) 366-7503.

LNM: 50-15

MILE 203.0 - CHANNEL CONDITION/AIDS TO NAVIGATION

Due to shoaling in the vicinity of Mile 203.0, there has been a significant change in the navigation channel. Five buoys have been relocated resulting in a channel shift towards the Missouri side of the river. Mariners who are unfamiliar with the area or that have not transiting the area recently are urged to exercise caution in the area.

LNM: 03-16

MILE 180.0 - BRIDGE MAINTENANCE

Eads Bridge; A containment system in the Missouri and Illinois spans remains suspended 3 feet below low steel. The containment system in the center span has been raised to 10 inches below low steel.

LNM: 01-16

MILE 35.0 - MILE 32.0 - LEVEE CONSTRUCTION

Continuing until further notice, the USACE is rebuilding the levee between approximate Miles 35.0 and 32.0, LDB. Multiple barges and equipment will be along the river bank during this operation. Mariners may contact the M/V MS. JENNIE at (901) 494-8427, for additional information. Mariners are urged to exercise caution in the area.

LNM: 04-16

MILE 500.0 - SUNK BARGE

A barge has been reported sunk in the vicinity of Mile 500.0, with approximately 100 feet of water over the top. The barge is reportedly not marked. Mariners are urged to exercise caution in the area.

LNM: 05-16

MISSOURI RIVER
MILE 372.6 - BRIDGE CONSTRUCTION

Fairfax Dual Bridge Replacement; Work continues on the new left descending pier and encroaches approximately 40 feet into the left descending navigation channel. The existing horizontal clearance of 406.0 feet in the right channel span will be maintained during construction. Mariners are encouraged to contact the onsite work boat M/V FRED R. MCKENZIE on VHF-FM Channel 13 or phone at (806) 912-7299.

LNM: 01-16

MILE 144.6 - SUNKEN DREDGE

A sunken dredge has been reported in the vicinity of Mile 144.6, LDB. Salvage operations are pending. Mariners are urged to transit the area with caution.

LNM: 40-15

MILE 82.0 - CHANNEL CONDITION/COTP ADVISORY

The upper gauge at Grays Landing, vicinity of Mile 82.0, reads greater than 15 feet. Due to reported high water and high flow conditions, the COTP has issued the following Safety Advisory; Fleeting facilities are advised to review and act in accordance with their waterfront fleet operators guide and company contingency plans and assign a person to be in continuous surveillance and to observe the barges in the fleeting facility. Double-up lines on the head of the fleet and provide an adequate number of spring and breast lines between the dock and the barges in the fleet. Review their need to secure towboat assistance. Mariners are urged to transit this area with caution.

LNM: 05-16

MILE 82.0 - MILE 61.2 - CHANNEL CONDITION/COTP ADVISORY

The gate opening at Maxwell Dam, vicinity of Mile 61.2, is greater than 15 feet. Due to reported high water and high flow conditions, the COTP has issued the following Safety Advisory; Exercise caution while transiting between Grays Landing Dam, vicinity of Mile 82.0 and Gates Light, vicinity of Mile 76.1.

LNM: 05-16

MONONGAHELA RIVER
MILE 2.3 - BRIDGE CONSTRUCTION

Birmingham Bridge; Due to construction, a temporary access platform extends approximately 4 feet below low steel thereby reducing the vertical clearance to 60.8 feet above pool stage.

LNM: 42-14

OHIO RIVER**MILE 237.5 - SHEET PILE CELL REPAIR**

A recent survey has identified repairs are needed to at least 1 of the sheet pile cells at the Racine L/D, in the vicinity of Mile 237.5. Intermittent delays to navigation may be necessary to affect the required repairs.

LNM: 04-16

MILE 314.7 - MARINE RAILWAY CONSTRUCTION

Continuing until approximately February 29, 2016, Southern Marine will construct a marine railway in the vicinity of Mile 314.7, RDB, Superior Marine Ways Inc. The contractors floating plant will consist of the M/V ELIZABETH YATES, a barge mounted crane and a work flat barge. Work will be conducted from 7:00 a.m. until 5:00 p.m., 7-days a week. During non-working hours the contractors floating plant will be moored at the worksite and lighted accordingly. The M/V ELIZABETH YATES will monitor VHF-FM Channel 8. Mariners are urged to transit the area at their slowest safe speed to minimize their wake.

LNM: 37-15

MILE 326.6 - BRIDGE CONSTRUCTION

Ironton-Russell Bridge Replacement Bridge; Construction is ongoing weekdays during daylight hours on the right descending superstructure. The left descending superstructure has been completed. Contact Brayman Construction work boat M/V MARK-A via VHF-FM Channel 13 or the work foreman at cell (412) 292-3219, for additional information.

LNM: 03-16

MILE 542.0 - AIDS TO NAVIGATION

A nun buoy and several can buoys have been reported not properly marking the channel in the vicinity of Mile 542.0. Mariners are urged to exercise caution in the area.

LNM: 05-16

MILE 595.1 - BRIDGE CONSTRUCTION

Proposed New Highway Bridge; Steel erection is ongoing channelward at both the left and right descending navigation piers. On various days during these evolutions, a crane and work barge will be encroaching the navigation channel from 7:00 a.m. until 7:00 p.m. A minimum horizontal clearance of at least 600 feet will be maintained in the navigation span during each segment erection. If an assist is requested through the work site, the onsite work boat, M/V KATHLEEN MARGARET can be reached via VHF-FM Channels 13, 16 or 73. After work hours, the barges will be moved from the navigation channel and a resulting 900-foot horizontal opening will be maintained. Mariners are encouraged to contact the onsite work boat for further information and advised to transit the bridge with caution.

LNM: 43-15

MILE 604.0 - AID TO NAVIGATION

A nun buoy has been reported not properly marking the channel in the vicinity of Mile 604.0, mid-channel. Mariners are urged to exercise caution in the area.

LNM: 52-15

MILE 723.7 - BRIDGE MAINTENANCE

Lincoln Trails Bridge; Vertical clearance is reduced to 84 feet above pool stage due to containment system. At times, pier work will be conducted from floating workplant located downstream of the channel piers, if necessary workplant will move on 1 hour advance notice by contacting "OCCI Workboat" via VHF-FM Channels 13 or 16, or by phone at (573) 220-5133.

LNM: 04-16

MILE 918.5 - L/D INTERMITTENT CLOSURES

Continuing until further notice, intermittent closures will be experienced at Smithland L/D (both chambers), in the vicinity of Mile 918.5. Closure of the chambers will not be simultaneous.

LNM: 04-16

MILE 940.8 - BRIDGE MAINTENANCE

I-24 Highway Bridge; At times work barges may be located channelward adjacent to the navigation piers in both the Illinois and Kentucky spans. Work barges will be removed each night. For more information, mariners may contact the onsite work boat M/V SIR KETTLEWELL via VHF-FM Channel 68 or by calling (314) 607-1699.

LNM: 33-15

MILE 953.0 - MILE 968.0 - L/D REPAIRS/TOW RESTRICTIONS

There will be changes in the width of the marked 420-foot channel on January 20, 2016. Contact the Olmsted Lockmaster. The following USACE restrictions remain in effect: Mariners MUST check in with the Olmsted Lockmaster at the approach points at Miles 953.0 and 968.0, via VHF-FM Channel 13, for clearance to continue to proceed towards the project. Vessel tow configurations are limited to the maximum dimensions of 15 barges in a 3 by 5 configuration downbound and 24 barges in a 4 by 6 configuration upbound with no hip barges or other configurations that could degrade normal steerage. There is no passing, meeting, overtaking or waiting/hovering from Mile 962.0 to Mile 966.0. Mariners MUST proceed at their slowest safe speed as the wind and current conditions allow to minimize their wake. Contact the Olmsted helper boats M/V GORDON STEVENS, M/V GENIE C or M/V LIPSCOMB via VHF-FM Channel 13, if assistance is needed while navigating the area.

LNM: 03-16

RED RIVER**MILE 222.5 - BRIDGE MAINTENANCE**

LA 511 Highway Bridge; Due to a containment system, vertical clearance below low steel is reduced by 8 feet. Mariners are urged to exercise caution in the area.

LNM: 44-15

TENNESSEE - TOMBIGBEE RIVER**MILE 85.0 - MILE 60.0 - AIDS TO NAVIGATION**

Multiple aids to navigation have been reported diving or submerged between approximate Miles 85.0 and 60.0, due to high water conditions. Mariners are urged to exercise caution in the area

LNM: 47-15

TENNESSEE RIVER**MILE 601.8 - BRIDGE CONSTRUCTION**

State Route 73 Highway Replacement Bridge; Cofferdam construction continues during daylight hours, on the right descending navigation pier with a crane barge encroaching approximately 20 feet into the navigation channel. A 470-foot navigational channel opening will be maintained during construction. For additional information, mariners may contact the work crew at (865) 680-5787 or (865) 640-5924 or the onsite workboat M/V LILA BLANCH via VHF-FM Channel 16 or by cell phone at (865) 680-3682.

LNM: 04-15

MILE 471.0 - L/D INTERMITTENT DELAYS

Attached as an enclosure to this LNM is USACE Nashville District Notice to Navigation Interest LRN 15-61, concerning intermittent delays at the Chickamauga L/D, in the vicinity of Mile 471.0.

LNM: 01-16

MILE 385.91 - BRIDGE CONSTRUCTION

B.B. Comer (South Bound) Dual Bridge; Steel is being erected for superstructure of the bridge. Mariners are urged to transit the area at their slowest safe speed to minimize their wake. Contact Scott Bridge supervisor via VHF-FM Channels 13 or 16 or cell (334) 381-0575.

LNM: 04-13

MILE 206.0 - MILE 151.0 - AIDS TO NAVIGATION

Multiple buoys have been reported missing or not properly marking the channel between approximate Miles 206.0 and 151.0. Mariners are urged to exercise caution in the area.

LNM: 03-16

Little Rock, AR. 72203-0867

PH. 501-324-5739

MCCLELLAN-KERR ARKANSAS RIVER NAVIGATION SYSTEM INCREASED DIFFERENTIALS ON THE WHITE RIVER ENTRANCE CHANNEL

This is to advise mariners transiting the White River Entrance Channel (WREC) of increased head differentials between Norrell Lock and Dam and Montgomery Point Lock and Dam. At 8:00a.m. today, the tailwater elevation at Norrell Lock and Dam was 149.86 ft-msl and the headwater elevation at Montgomery Point Lock and Dam was 146.65 ft-msl with a differential of 3.21 feet. The WREC differential is forecasted to remain near 3 feet for five days. Mariners are reminded of advised tow restrictions during increased differentials:

WREC Differential

Barges

2.9 feet or less

no restriction

3.0 to 4.4 feet

12 barge down bound restriction

No restriction up bound

4.5 to 5.0 feet

9 barge down bound restriction

No up bound restriction

5.1 to 5.9 feet

4 barge down bound restriction during daylight

2 barge down bound restriction during night

No up bound restriction

Mariners transiting the WREC should use extreme caution in this area, especially when passing Montgomery Point Lock and Dam. Contact Montgomery Point Lock and Dam or Norrell Lock and Dam for current differential and elevations or visit our website at

<http://www.swl.usace.army.mil/Missions/WaterLevels.aspx>

Questions or requests for additional information concerning this notice should be directed to James McKinnie in the Little Rock District Office, at (501) 324-5739 or (501) 324-5096, or you may email CESWL-OP-OM@us.army.mil.

NASHVILLE TN 37203-3863

“Self Help” Program and Lockage Procedures at Nashville District Locks

**Reference: Notice to Navigation Interests CELRN-OP-N 07-34 dated October 3,
2007 subject as above.**

This notice is a reissue of the referenced notice.

1. Industry will be permitted to use the voluntary services of any towboats that are waiting in queue on either end of the lock, to expedite lockages by assisting other tows to land along approach walls, re-arrangement of set-over tows, and pulling out barges of non-powered cuts. Additionally, tows in queue, with the exception of petroleum and hazardous cargo tows, may assist on a voluntary basis by allowing other tows to lie alongside while preparing to lock or making up for departure.
2. When industry is providing the volunteer helper boat, the locking sequence may be changed, if the lockmaster determines it would expedite traffic or improve safe operations.
3. When three or more tows are waiting above or below the lock, a series of tows (usually three) will be locked in the same direction before the procedure is reversed. This procedure will be followed until there are no tows left in queue. The procedure of locking first-come-first-served will be followed when less than three tows are waiting above or below the lock.

4. It will be necessary for tows to follow one another on the guidewall when a series of lockages are being made in one direction. Each tow should be aware of the tow that it follows and be on the guide wall as soon as that tow enters the lock chamber. The Lockmaster may vary this procedure as required by conditions at the lock. While this practice will speed up the lockage process, it is imperative that tows exercise extreme caution.
5. When a workable queue exists, vessels will contact the lock on Channel 13 to advise that they have arrived and are available to assist as a helper boat. Thereafter, information concerning lockage will be broadcast on Channel 14 unless advised otherwise by the Lockmaster. Towboats that do not answer the radio call from the lock will be dropped to the end of the waiting line.
6. All towboats are to stay with their tows while waiting lockage unless volunteering to assist other tows through the lock.
7. No adding or dropping of barges will be allowed once the tow is in queue. Tows requiring a set-over lockage should, when possible, make their set-over prior to entering and after clearing the lock if other traffic is waiting.
8. Participation in the "Self-Help" program is strictly on a volunteer basis for the sole purpose of reducing delay time to industry at Nashville District Locks. The Lockmaster or his representative will call a particular boat by radio and advise of the need for volunteer action indicated above. This advice shall not be considered an order or a direction for action within the authority of the Lockmaster under 33 CFR 207.300. No captain, pilot or other responsible person in charge of the vessel is obligated to respond, except as a volunteer. The United States assumes no liability for the transmission of such advice and shall not be responsible for any consequences of this volunteer action.

All navigators are urged to cooperate fully to accomplish maximum efficiency in transiting all locks in this district. All pilots are requested to provide the necessary number of personnel aboard their vessels to ensure that manpower is available to safely transit the locks.

WINTER NAVIGATION ON THE OHIO RIVER AND TRIBUTARIES

In the interest of navigation safety on the waterways, users are reminded that navigation during winter months is a hazardous undertaking. Operators are requested to exercise extreme caution during this season and carefully evaluate the makeup and motive power for each tow.

ICE CONDITIONS

It is common for ice to build up beneath barges navigating the river, causing subsequent grounding in shoal areas. Should this occur, notify the nearest navigation structure as to your location and exercise caution when trying to remove barges so as not to disturb the navigation channel. When locking down bound there is the potential that build-up of ice under a barge could come in contact with the bottom of the lock chamber and puncture the bottom of the barge causing it to sink. Additionally, any build-up of ice between barges in a tow or on the sides of the barges will increase the overall width and possibly hamper the entrance or the exit of the locks. Any noticeable build-up, either in or under the tow, should be checked to assure that the lockage can be accomplished without incident. Whenever conditions warrant, vessel owners should consider adjusting their tow size to compensate for ice formation.

When ice builds up on the lock walls to the extent that full usage of the lock chamber is prohibited, width restrictions will be imposed on lockages. In addition, ice at times will prevent the full opening of the lock miter gates. Should this occur, locking will cease until the ice can be removed or the width of the tow is reduced. Navigators should contact the Lockmaster at each facility to verify locking conditions. This practice will continue as long as ice conditions warrant. Each company should access the Ohio River Region's computerized navigation daily reports to keep abreast of the latest conditions. This information can be obtained via the internet from the Great Lakes and Ohio River Division's Water Management website at: <http://www.lrd-wc.usace.army.mil/text/hunrpt.txt>.

Another occurrence during heavy icing conditions is the freezing of the floating mooring bitts in the recesses in the lock walls. In the event the floating bitts become inoperable, it will be necessary for the vessel to utilize the fixed line hook and manually move the mooring lines as the water in the chamber is raised or lowered. Additional lines should be readily available for the deck crew.

In an effort to assist navigators and help alleviate the ice problems at navigation structures, the auxiliary lock chamber may be used for the passage of ice and may not be available for use by traffic at the following locks:

Location

River Mile

Meldahl Locks	436.2R
Greenup Locks	341.0L
Robert C. Byrd Locks	279.2L
Racine Locks	237.5L
Belleville Locks	203.9R
Willow Island Locks	161.7R

All three locks on the Kanawha River - Winfield (mile 31.1R), Marmet (mile 67.7R) and London (mile 82.8R) have the capability for passage of ice. This is accomplished by using the Roller Flap Dam Gate, unlike the Ohio River where the emergency gates or bulkheads are used in the auxiliary chamber.

During heavy ice conditions, historic information in the Huntington District indicates that ice jams can most frequently be expected to form on the Ohio River at the following locations:

- Meldahl Dam to Augusta, Kentucky (mile 436.2 to approximate mile 429.0)
- Manchester Islands Area (mile 395.2 to mile 393.5)
- Brush Creek Island Area (mile 388.0 to mile 387.0)
- Scioto River to New Boston, Ohio Area (mile 356.6 to mile 352.0)
- Racine Dam to Head of Letart Island (mile 237.5 to mile 235.0)
- Ravenswood, West Virginia, Area (mile 223.0 to mile 220.0)
- Long Bottom, Ohio, and Area (mile 210.0 to mile 208.0)

Navigators are advised that ice conditions may become severe enough to warrant the closure of navigation on certain reaches of the river. Should conditions so develop, it is imperative that navigators take refuge in safe harbors. Safe refuge from ice may be found for vessels operating on the Ohio and Kanawha Rivers at the Government owned ice piers at the following locations in the Huntington District:

<u>Ohio River Mile</u>	<u>City</u>	<u>No. of Piers</u>	<u>Bank</u>
251.7	Middleport, Ohio	3	Right
269.5	Gallipolis, Ohio	3	Right
408.5	Maysville, Kentucky	3	Left

Kanawha River Mile

*Two additional piers at this location are owned by Amherst Industries, Incorporated.

The locations of the ice piers are shown on the Huntington District Ohio and Kanawha River Navigation Charts. Several privately-owned piers are also located along the Ohio and Kanawha Rivers. In addition to the ice piers, safe harborage is afforded in the mouth of the Muskingum, Little Kanawha, Guyandotte, and Big Sandy Rivers. Some of these areas are designated as congested areas on the 2014 Navigation Charts and can only be used for harborage during icing conditions. Navigators using these streams for safe harborage are cautioned about low clearances of the bridges near the mouth of these streams. Tows using the ice piers and the mouths of the tributary streams should be moored in such a manner as to not obstruct the passage of other vessels.

HIGH FLOW CONDITIONS

Seasonal high water, normally encountered during the late winter and early spring months, increases the problem of maintaining a safe course. Vessel operators are reminded that specific regulations govern the operation of vessels on navigable waters at flood stage. When passing habitations or other structures partially or wholly submerged that are subject to damage from wave actions, vessels shall proceed slowly and keep as far away from such structures as circumstances allow. The Navigation Charts have the elevation of ordinary high water indicated on each sheet, except for the R. C. Byrd Pool. When water levels in the river is equal to or is greater than that elevation, navigators should operate near the published sailing line to prevent damage attributable to waves created by the vessel.

In the immediate vicinity of navigation structures, the potential exists for adverse out draft currents to develop across the upper lock approaches whenever there are high flows in the river. These currents, coupled with high winds, exert tremendous forces upon large flotillas, especially when empty barges are in the tow. All operators should carefully evaluate the makeup of each tow and its motive power. Power should be sufficient to counter the adverse conditions that can be expected during a voyage.

The Ohio River current, coupled with excessive headway when exiting a slack water area of any lock, especially R. C. Byrd upper approach, may be a contributing factor for the head barge of tows to “dive” as they exit the canal and enter the main channel. Navigators should carefully evaluate their tow configuration and give special attention to the draft and freeboard of their head barges. Extreme caution and good navigational judgment should be used at all times, particularly when there is more than forty feet of gate openings on the dam.

MOORING TOWS

Another facet of this season that is of major concern is the problem of breakaways. Barges left unattended, whether simply tied to natural objects or moored at terminals and fleeting areas, are subject to being dislodged by strong currents aided by wind, wave-wash from passing tows, ice flows and/or drift. Operators are urged to use extreme care in tying off tows or individual barges, to prevent such occurrences. Three or more lines are recommended, with both the upstream and downstream ends of the tow being made fast.

If, under emergency conditions, it becomes necessary to tie off tows along the banks, extreme care should be exercised in selecting trees or other natural objects for mooring. Banks are usually softened by saturation during

high water and during spring thaws and rains, and using trees near the water for tie off are poor risks under such conditions. Should the emergency necessitate temporary mooring within ten miles of any navigation dam, especially upstream of one, the Lockmaster will be promptly advised.

If conditions warrant, the Huntington District Emergency Operations Center will be opened and maintained on a round-the-clock basis serving as an information/control center. Daily or as-required aerial flights over the river, supplemented by on-ground patrols, will be utilized to supplement the data obtained from our established field offices, to maintain current river condition data base for operational uses. Navigators wishing to make reports to the Huntington District should call (304) 399-5239 or relay the information through one of the Huntington District navigation projects.

**MAIL DELIVERY AND CREW CHANGE POLICIES FOR THE HUNTINGTON
DISTRICT AT NAVIGATION LOCKS FOR TOWBOAT**

The following policies are in effect for all navigation locks within the Huntington District. Crew changes will be allowed only when security levels warrant. The following procedures will be used for crew changes:

The towing companies must request permission from the Lockmaster or designee for crew changes at least two (2) hours prior to requested change. If given permission, the shift change will take place at high pool (when lock chamber is full). The crew change vehicle will remain outside the government facility gate until the motor vessel has arrived at the lock. All crew members must be in possession of a Transportation Worker Identification Credential (TWIC), with all other passengers having valid photo ID. A valid photo ID would be either a state-issued driver's license or a state- or federally-issued identification card. Crew change vehicle will not be left on the government facility or unattended. Once the crew change vehicle leaves, all personnel will leave with the vehicle and not stay on the government facility.

No mail and/or packages will be accepted for any non-government personnel at any navigation lock. Also, stamped mail from boat crews will not be accepted by lock personnel for postal pickup. Personally delivered mail and/or packages will not be accepted by the lock personnel, nor shall items be stored at the locks for later pickup by towboat personnel. The only mail that will be accepted by the project will be stamped mail addressed to the towing company.

If a motor vessel needs parts or service for breakdown maintenance, they must request permission to deliver them to the project two (2) hours in advance. If the Huntington District Repair Fleet is working at a project, there will be no crew changes.

NOTIFICATION OF SINKING OR SUNKEN VESSELS,

VESSEL GROUNDINGS, AND BARGE BREAKAWAYS

Timely notification of sinking or sunken vessels, groundings, and barges breakaway is a matter of great concern to the United States Army Corps of Engineers because of the potential danger that could result from unreported cases.

Pursuant to Section 7 of the River and Harbor Act of August 8, 1917, regulations have been prescribed to govern the use, administration, and navigation of the Ohio River, the Mississippi River above Cairo, Illinois, and their tributaries. Excerpts from these regulations (33 CFR 207.300) are as follows:

“Any accident resulting in uncontrolled barges shall immediately be reported to the nearest lock. The report shall include information as to the number of loose barges, their cargo, and the time and location where they broke loose. The lockmaster or locks shall be kept informed of the progress being made in bringing the barges under control so that they can initiate whatever actions may be warranted.”

“Sunken or sinking barges shall be reported to the nearest lock both downstream and upstream of the location in order that other traffic passing those points may be advised of the hazards.”

“Any other activity on the waterways that could conceivably endanger navigation or a navigation structure shall be reported to the nearest lock.”

Reporting incidents such as these to other Federal Agencies other than the U. S. Army Corps of Engineers does not fulfill your reporting obligation.

If you have any questions, please contact this office at (304) 399-5239.

REVIEW OF REGULATIONS AND

GENERAL SAFETY PRACTICES

Notice is given that the Huntington District Corps of Engineers is requesting that all towing companies and other waterway users review their operating procedures to insure that their personnel are complying with all regulations and general safety practices.

Regulations prescribed by the Secretary of the Army to govern the use, administration, and navigation for the Ohio River, Mississippi River above Cairo, Illinois, and their tributaries are contained in the "Blue Book" (33 CFR 207.300). It is required that a copy of these regulations be kept at all times on board each vessel regularly engaged in navigating the rivers to which these regulations apply.

In the interest of safety to personnel and property, it is essential that the following procedures be reviewed by your operating vessel personnel in order that they may have a comprehensive understanding of the rules for vessels in the locking process, including the act of approaching or departing a lock:

- a. All deck hands working outside areas not having bulwarks or handrails shall wear a USCG approved work vests which shall be fastened.
- b. Smoking, open flames, chipping or other spark-producing activities are not permitted during the locking cycle on or inside barges, on outside areas of the towboat, or on the lockwalls, except in designated areas.
- c. Vessels with flammable or hazardous cargo barges, loaded or empty, are required to use sparkproof protective rubbing fenders ("possums"). All vessels should utilize "possums" to help alleviate damages that are occurring to lock structures. Repairs necessitated by these damages require closure of the chambers and are expensive.
- d. Tow boat operators shall not use the walls of the lock to push off to gain thrust. This technique is also known as "heeling" and is not permitted.

The observance of safe locking procedures leads to a safer and more efficient locking process both for the navigation industry and for the U.S. Army Corps of Engineers.

Thank you for your help and participation.

Navigation Notice

McClellan-Kerr Arkansas River Navigation System

Navigation Notice Number:
TD 2016-2: Amendment No. 1

Date:
6 January 2016

Tulsa District

In Reply Refer to:

CESWT-OD-TC
1645 S. 101st E. Ave.
Tulsa, OK 74128-4609

AMENDMENT No. 1

SAILING ADVISORY FOR TRANSIT

POOL 15: NM 348.3 to 349.1

McCLELLAN-KERR ARKANSAS RIVER NAVIGATION SYSTEM, OKLAHOMA

Crews have completed work to adjust channel by moving channel marker buoys from NM348.4 to NM349.1. Standard Green/Red buoys were used to mark the alternate channel. Tows should transit this area under caution as there are several turns to stay inside the channel. Nine foot depth is present while the pool deviation of 462.00 is in place.

Due to the shoaling and difficulties locating buoys, vessels should use these markers at their own risk and use extreme caution while transiting this area. Amendments to this Notice will be issued as temporary measures are put in place.

Waterway users are asked to check with Lock No. 15 for the latest information. Questions or request for additional information concerning this notice should be directed to Mr. Rodney Beard; Navigation Project Manager: 918-775-4475 ext 5890 or Mr. Vic Heister; Navigation Field Engineer: 918-669-7244.

OAK RIDGE ROWING ASSOCIATION 2016 SCHEDULE

Clinch River Mile 49-52 (Tennessee River Basin)

The Oak Ridge Rowing Association anticipates the following schedule of events for the 2016 season. This is to notify interested parties of the safety concerns with operations of power water craft in the proximity of the low profile, slow moving craft used in preparation for and during rowing events. All operators of water borne vessels are asked to exercise extreme caution when transiting this area during these events.

<u>Date</u>	<u>Event</u>	<u>Date</u>	<u>Event</u>
February	Initial Course Survey and Setup Teams Spring Training	May 1	University of Tennessee Scrimmage
March	Installation of lane cable Course survey and adjustment	May 14-15	Big 12 Championship Regatta
